HTML-CSS-(JS)

(2016-10-24)

Class 4
External resources

A page to get started

1. Download file (see right) to your coderdojo2016 directory
2. Use notepad++ to look at the html code.
3. Open the file in Chrome to see how it looks. Notice:
 - a. Which css sheet is referenced
 - b. That the sections of the page are given classes (these are defined in w3.css) that change how they 'look'.

From Examples - class 4

er.html

Let's change how it looks.

1. Change `'w3-deep-purple'` to `'w3-black'`.
2. Change `'w3-indigo'` to `'w3-black'`.
3. Add `'class="w3-border w3-border-red w3-padding-16"'` attribute to the 3 image tags.

As you make the changes keep checking chrome to see what the changes look like.

The see what other colours are available check this page: [w3css colours](https://www.w3schools.com/css/default.asp?filepath=css/colors)

Time to get a little creepy

Fonts are also resources

1. Add the code opposite into the head part of your page.
2. Add 'w3-creep-font' and 'w3-text-red' to the class attribute of the header parts.
3. Add 'w3-opensan-font' to the class attributes of the section parts.

To see other fonts available goto: [google fonts](https://fonts.google.com/)

```
<link rel="stylesheet" href="https://fonts.googleapis.com/css?family=Creepster" />
<link rel="stylesheet" href="https://fonts.googleapis.com/css?family=Open+Sans" />
<style>
  .w3-creep-font {
    font-family: 'Creepster', cursive;
  }
  .w3-opensan-font {
    font-family: 'Open Sans', sans-serif;
  }
</style>
```
